HOURSWILL – HARM FULL EMBRACE

After the release in 2014 of their well-received debut record, HOURSWILL emerge again in 2017 with their 2nd album called "Harm Full Embrace". An epic collection of 8 new songs on which the blend of heavy, thrash, black, doom, and death metal with hard rock and progressive music, allied with the strong production made in the Pentagon AM studios, takes the band to a very interesting stage of their musical evolution and turns this record, without a shadow of a doubt, into one of the most relevant Ethereal Sound Works releases till date!!!
